

# Eveshop's Migration Journey with Google Cloud

NGC partnered with EVESHOP to successfully modernize their infrastructure using Google Cloud. NGC provided comprehensive support throughout the migration process, optimizing performance and ensuring a seamless transition.

## The challenge

The existing infrastructure lacked the flexibility to scale resources up or down in response to fluctuating demands. This resulted in performance bottlenecks and hindered the company's ability to adapt to changing business needs and growth. The on-premises infrastructure suffered from performance issues, leading to slow response times, application latency, and decreased employee productivity.

## The solution

EVESHOP implemented a robust and scalable infrastructure on Google Cloud, leveraging key products like Google Kubernetes Engine and Compute Engine. The migration process followed Google Cloud's best practices and architecture framework to ensure a secure and high-performing environment.

## The result

By migrating to a robust and scalable Google Cloud infrastructure, EVESHOP overcame previous performance limitations and gained the ability to adapt to changing business needs. This resulted in improved application performance, increased employee productivity, and enhanced customer experiences.

We provided our customer with a modern, stable, and scalable system that is well-suited to microservice architecture. This system offers a reliable framework and superior performance. During this process, NGC offered comprehensive support, assisting in all aspects of Sales, Service and Support.

### About EVESHOP

EVE, a personal care and cosmetics retailer under Turgut Aydın Holding, opened its first store in Turkey in 2015 with the goal of making beauty products accessible to everyone. They prioritize female employment and offer a wide variety of products through their online store and over 380 physical stores across Turkey.

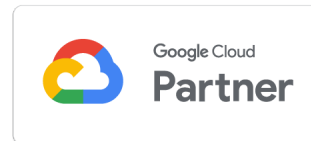

Vertical/horizontal solution: Retail & Wholesale

Primary project location: Turkey
